FOR IMMEDIATE RELEASE

## **MechoSystems Debuts SoHo Shadecloth Collection at NeoCon® 2015**

LONG ISLAND CITY, N.Y.—MechoSystems, the global leader in commercial WindowManagement® solutions, is launching a new line of shadecloths at this year's NeoCon, the world's largest commercial-interiors event. The shadecloth collection is called SoHo.

The SoHo Collection consists of thin, finely woven yarns and distinctive color themes. The shadecloths have a smooth texture and a soft hand for a gentle, decorous look. The colors, while broadening the designer's palette, are subtle, supplying only a minimal accent.

All 12 are available in the same range of open weaves, allowing the specifier to maintain color consistency throughout a space while letting in more or less daylight with a wider or denser weave according to the unique solar orientation of each window wall.

Features of the fabric:

- Available in 12 designer colors with 1%, 3%, or 5% openness.
- Refined 2 x 2 basket weave.
- Smooth texture.
- Soft hand.

“SoHo” is not simply a shorthand for elegance and refinement. The name of this collection commemorates MechoSystems' half-century-long journey from a cast-iron storefront south of New York City's Houston Street to the top of an industry.
