

MechoShade Systems is now MechoSystems.

You may have noticed something different about us in our advertisements and literature—we've changed our name to MechoSystems. Why? To more accurately reflect what it is we do.

"We design, develop, and market much more than window shades, and our name now makes that point," said MechoSystems President and COO Jan Berman.

Introducing a Y Power Cable that Will Lower Your Costs.

Our new Y Power Cable is a wiring accessory that allows you to pull just one wire for every two motors. Typically, there are four wire pulls per junction box. But the Y Power Cable makes twice as many motor connections per box possible. This means that fewer wire pulls are needed and fewer junction boxes, as well—resulting in lower wiring and installation costs.

- For use with IQ®, I-Con®, ILT, and RTS motors (but not with standard motors).
- Ideal for back-to-back motors or DoubleShades®.
- Available in a one-foot and five-foot lengths.
- An ETL-approved system component.
- Part no. ELRP 1301 VL WH. (1-ft.)
- Part no. ELRP 1305 VL WH. (5-ft.)

1-ft. Y Power Cable

Did you know?

According to *McGraw-Hill Construction*, the value of green-building starts were up by 50% from 2008 to 2010 and represented 25% of all new construction in 2010. According to the editors, the market size for green-building construction is expected to reach \$135 billion by 2015.
